Introduction

The meme coins want to get to a penny or a dollar. We want to get to a million dollars each. Hence, the initial and maximum supply of 100 tokens per blockchain. And we are planning all sorts of features like staking, farming, loaning, central exchange crypto.com listing after the dex launch.

Summary

Hundo Token (HUN) – max 100 tokens EVER produced. Staking rewards produce a token called MIL which will debut at 1\$

Sold by presale in 3 phases. 75\$, 80\$, 85\$. then liquidity added and released on dex for trading at 100\$ open.

Millie Token (MIL) – max 1,000,000 tokens EVER minted – distributed ONLY by staking HUN

lock in 1 hun for 7 days = immediately receive 10 MIL tokens

lock in 1 hun for 14 days = immediately receive 35 MIL tokens

lock in 1 hun for 30 days = immediately receive 100 MIL tokens

Initial liquidity of 1,000 MIL in liquidity at 1 usdt = 1 mil

HUN – Hundo token 100.00000000

MIL – Millie token 1000000.00000000

Neither token mintable, minable, etc.

Initial supply is max supply

Hun tokens have voting rights which will take place on telegram (after presale)

.1 hun = 1 vote

Maximum buy per person in presale is one token

Telegram group: <https://t.me/+GVPXuqdgGyU3ZWEEx>

Each coin comes with corresponding NFT at end of presale. If coin is purchased in increments that NFT goes to auction.

Next phases will be 100 HUN tokens on more blockchains and dex. ETH, SOL, AVAX, DRC-20, BRC-20, TRC-20 with swappable functionality.

End result: 700 HUN tokens and 7,000,000 MIL tokens on 7 blockchains with ability to stake and swap between chains and with other popular currencies.

We began with the BNB chain where small investors can easily participate with low gas fees.

Mission

Our mission is to create an ecosystem in which there is 100 HUN tokens and 100 MIL tokens on each blockchain and swapping between each blockchain.

Vision

Our vision is to create something of value that early adopters could create an income stream from.

Tokenomics:

Token Information:

- **Phase 1:** 20 tokens @ 75\$
- **Phase 2:** 20 tokens @ 80\$
- **Phase 3:** 20 tokens @ 85\$
- **Marketing:** 5 tokens
- **Design:** 5 tokens
- **Pool:** 5 tokens
- **Founders:** 5 Tokens
- **Liquidity:**
 - 20 HUN tokens @ 100\$ USDT
 - 1000 MIL tokens @ 1\$ each
 - Liquidity on pancake-swap at end of phase 3
 - **Duration:** 60 tokens or 100 days

Token Name: Hundo Token

Token Symbol: HUN

Decimal: 8

Token Total Supply: 100 (fixed)
